ABOUT

Hello, I am a **Professional Software Developer**. Currently I have 3 years professional experience as a front-end programmer. I built front end side application for web, mobile or game application.

I love technology and science, I like to code and learn how to build something. And with that passion I determined myself to pursue this career path to the top.

Being a self-motivated person, I can work independently or as a team, but I would prefer working as team if I had to choose.

ACTIVITY AND INTERESTS

I have interest in technology, science and business. On my free time use to watch video related to that topic or do some little project or learning new things.

I am also joined some community such as English Club to improve my English Proficient.

FARIH MUHAMMAD

(**Curriculum Vitae**)

WORK EXPERIENCE

Plexus Studio
Front End Programmer
2018–2020
Plexus.id recognized company for their experience in games, web based, mobile, AR and VR apps Development.
Responsibilities:
- Implement and test Front End Application such as **web**, **mobile**, **games**, **AR** dan **VR**.
- Supportive and have a good Communication skill to complete the project.
- Learn New Technology for efficient and effective development process.

While being part of Plexus, I am using **vanilla js, bootstrap, jquery** and other libraries or framework like **vue js** that are needed for **web apps**. For mobile apps I am using **react native** and **flutter** because of the project requirement. And for **games** or **Augmented Reality** Apps, I am using **unity engine** as a development tools.

Geta Cipta Piranti
